

Special Issue

**The role of fluids in faulting and fracturing in carbonates and
other upper crustal rocks**

Guest Editors

**Fabrizio Agosta, P. Benjamin Luetkemeyer, Juliette Lamarche,
Juliet G. Crider and Olivier Lacombe**

CONTENTS

Editorial

F. Agosta, P.B. Luetkemeyer, J. Lamarche, J.G. Crider and O. Lacombe	1
Impact of stylolites on the mechanical strength of limestone	
P. Baud, A. Rolland, M. Heap, T. Xu, M. Nicolé, T. Ferrand, T. Reuschlé, R. Toussaint and N. Conil	4
Frictional and hydraulic behaviour of carbonate fault gouge during fault reactivation – An experimental study	
C. Delle Piane, A. Giwelli, M.B. Clennell, L. Esteban, M.C.D. Nogueira Kiewiet, L. Kiewiet, S. Kager and J. Raimon	21
Fault and fracture patterns in low porosity chalk and their potential influence on sub-surface fluid flow—A case study from Flamborough Head, UK	
D.A. Sagi, N. De Paola, K.J.W. McCaffrey and R.E. Holdsworth	35
Deformation mechanisms and petrophysical properties of chert and limestone fault rocks within slope-to-basin succession (Gargano Promontory, Southern Italy)	
I. Korneva, E. Tondi, F. Balsamo and F. Agosta	52
The impact of in-situ stress and outcrop-based fracture geometry on hydraulic aperture and upscaled permeability in fractured reservoirs	
K. Bisdorf, G. Bertotti and H.M. Nick	63
Crestal fault geometries reveal late halokinesis and collapse of the Samson Dome, Northern Norway: Implications for petroleum systems in the Barents Sea	
N.H. Mattos, T.M. Alves and K.O. Omosanya	76
Reservoir leakage along concentric faults in the Southern North Sea: Implications for the deployment of CCS and EOR techniques	
N.I.P. Ward, T.M. Alves and T.G. Blenkinsop	97
Fractured reservoir modeling: From well data to dynamic flow. Methodology and application to a real case study in Illizi Basin (Algeria)	
F. Felici, A. Alemanni, D. Bouacida and P. de Montleau	117
The role of crystallized magma and crustal fluids in intraplate seismic activity in Talala region (Saurashtra), Western India: An insight from local earthquake tomography	
P. Mahesh and S. Gupta	131
Long-term GNSS measurements from the northern Adria microplate reveal fault-induced fluid mobilization	
G. Rossi, D. Zuliani and P. Fabris	142
Effective crustal permeability controls fault evolution: An integrated structural, mineralogical and isotopic study in granitic gneiss, Monte Rosa, northern Italy	
S.E.M. Lawther, T.J. Dempster, Z.K. Shipton and A.J. Boyce	160
Constraints on paleofluid sources using the clumped-isotope thermometry of carbonate veins from the SAFOD (San Andreas Fault Observatory at Depth) borehole	
P.B. Luetkemeyer, D.L. Kirschner, K.W. Huntington, J.S. Chester, F.M. Chester and J.P. Evans	174

Syn- and postkinematic cement textures in fractured carbonate rocks: Insights from advanced cathodoluminescence imaging E. Ukar and S.E. Laubach	190
Contrasting fault fluids along high-angle faults: a case study from Southern Apennines (Italy) R. Sinisi, A.V. Petrullo, F. Agosta, M. Paternoster, C. Belviso and F. Grassa	206
Growth of a Pleistocene giant carbonate vein and nearby thermogene travertine deposits at Semproniano, southern Tuscany, Italy: Estimate of CO ₂ leakage G. Berardi, G. Vignaroli, A. Billi, F. Rossetti, M. Soligo, S. Kele, M.O. Baykara, S.M. Bernasconi, F. Castorina, F. Tecce and C.C. Shen	219
Temperature and composition of carbonate cements record early structural control on cementation in a nascent deformation band fault zone: Moab Fault, Utah, USA K.R. Hodson, J.G. Crider and K.W. Huntington	240
